

November 09, 2025: On Continuing Invasive Spying and Forceful Intrusion Into Our Private Legal Matters

I am writing to document that I am still experiencing a very blatant, and very obvious, intrusive spying presence along with an intentionally intrusive and obvious noise making presence that is continuing to drive unwanted messaging into our home as I work on the private legal filings for my own family.

These are the obvious circumstances that I would face if I were filing legal documents against the culprits of this intrusive spying and acoustic bombardment campaign.

Donald Trump's Campaign for President began this unwanted intrusion into our technology and home around 2021 and has continued to forcefully interject himself and his team of spies and criminal agitators into our home ever since.

This is the type of person that is running the United States of America and that the Department of Justice has determined to be (at least temporarily) immune from any sort of criminal prosecutions - even though the same person is already, in fact, a convicted felon.

The nature of Donald Trump's previous felony conviction was directly related to unlawful tax filings with the State of New York, but it was indirectly related to a 'Catch and Kill' scheme to 'hush' the free speech of a woman that knew of information that was damaging to Donald Trump's reputation.

Obviously, this type of unlawful spying into our home is the same sort of 'damaging' information to Donald Trump's reputation that earned him his first felony conviction and I am looking forward to the Department of Justice taking up this case against Donald Trump as his second felony conviction in due time.

I am actively encouraging the Department of Justice to immediately abandon such a foolish policy that would prevent the filing of criminal charges against a convicted felon for more obviously felonious conduct.

To maintain such a policy is to maintain an absolute second tier of injustice that favors those that can reach such a level of public office - whether by lawful or unlawful force.

I am certain in stating publicly that somewhere along the way Donald Trump actually became insane with power and is obsessively watching over our home as a potential presence that will 'cause him to fail.'

Obviously, such a delusion is far outside the realm of reality, but it is evidenced to me on a daily basis. In fact, it is Donald Trump's own self-consciousness of his own guilt that is causing his fall from power and grace of the people of the country and world.
